Pump pressures for each IV line should be documented hourly or when adjusted on the flow sheet

### Clinical Guidelines (Nursing) : Peripheral Intravenous (IV ...

It's an interesting question and more interesting is how different nurses describe their documentation of an IV start. A few nursing colleagues on IVchat said: (thanks, twitter buddies) " created stamp for chart that identifies size, site, no. of attempts, time date and operator" (site meant 2 refer 2 the actual vein & location, if u know ur anatomy well enough, most just put back of hand, etc)

### Where's the IV site??? | Infusion Nurse Blog

We are looking into how to document specific IV site with computer documentation. We feel we would like to be able to determine exact site when we have to review a chart. Does anyone out there have suggestions for specific site documentation on the computer as we already know we cannot add a diagram. Any suggestions would be very helpful.

### Specific site documentation | IV-Therapy.net

I am assuming you are in acute care. Generally speaking,if you are going to state what you want a nurse specifically to do in a policy and procedure you must also expect the nurse to document and have a place to document that. You must state what the minimum standard is,so what I do is pick a time based on the practice area.
