It is important to note that more details of the R4 AIS Transponder System installation are found in the R4 AIS Transponder System Installation Manual (included in the R4 AIS ...

## 7000 108-033,B,J4 Installation Guide for Junction Box

1. Remove the Junction Box cover. 2. Place a plastic washer on a water-tight fitting. Thread the sensor cable through a cap and water-tight fitting. Leave an adequate length of cable between the sensor and fitting to provide a drip loop. 3. In the bottom of the Junction Box, locate one of the small holes closest to the terminal being used for the sensor.

## Junction Box Installation & Operation Manual

Separate the circuit wires at the existing splice and loosen the cables as needed to make room for the new junction box. Anchor the box to the framing (or other support structure) with screws driven through the factory-made holes in the back or side of the box, as applicable.

## How to Install an Electrical Junction Box

Wrap the copper or silver ground wires from the light fixture around the ground screw. Then, connect it to the supply ground wire of the junction box with a wire connector. Connect the black or red current wires and the white neutral wires. Then, push the connected wires into the junction box. 5.

Electrical codes generally require that all electrical devices, and the wiring connections to those devices, must be enclosed in an approved electrical box. Often known as a junction box, this metal or plastic box includes a cover to protect the wiring within and protect you from the wiring. This rule is demonstrated nicely by wall switches, receptacles, and standard light fixtures, all of ...

## **Electrical Installations That Don't Need Junction Boxes**

Run cable through the hole. Strip 8-12 inches of sheathing and run the cable into the box. Whichever clamping method the box uses, 1/2-inch of sheathing should show inside the box. Tug to make sure the cable clamps tightly.
