International Environmental Law And World

ICEL has, for five decades, played a unique role in the creation of international environmental law and establishing the juridical foundation for many aspects of sustainable development. Founded in 1969, in 2019 ICEL celebrated its 50th anniversary. Advancing the Law to Sustain People and Nature

ICEL - ICEL

International Environmental Law (IEL) is concerned with the attempt to control pollution and the depletion of natural resources within a framework of sustainable development. It is a branch of public international law - a body of law created by states for states to govern problems that arise between states.

International Environmental Law - Public International Law ...

Center for International Environmental Law | CIEL. CIEL seeks a world where the law reflects the interconnection between humans and the environment, protects the dignity and equality of each person. Since 1989, CIEL has used the power of law to protect the environment, promote human rights and ensure a just and sustainable society.

Environmental Rule of Law. At the 1st IUCN World Environmental Law Congress: the "IUCN World Declaration on the Environmental Rule of Law" was adopted, outlining 13 principles to serve as the foundation for developing and implementing solutions for ecologically sustainable development. Photo: 1st World Environmental Law Congress.

World Commission on Environmental Law | IUCN

A new publication from the United Nations University (UNU) Press, entitled *The Future of International Environmental Law*, attempts the demanding task of assessing the effectiveness of existing international environmental law. In the face of today's rapidly evolving environmental crises of climate change, biodiversity loss and ocean acidification, such appraisal is important for informing the ...

What Future for International Environmental Law? - Our World

First, international environmental law principles can hardly be dissociated from the politically sensitive and complex issues surrounding the notion of sustainable development. Second, a general approach is at odds with the sheer heterogeneity of the phenomenon of principles.

Principles of International Environmental Law: an Overview

Environmental law, principles, policies, directives, and regulations enacted and enforced by local, national, or international entities to regulate human treatment of the nonhuman world. The vast field covers a broad range of topics in diverse legal settings, such as state bottle-return laws in the

Environmental Law - United Nations and the Rule of Law

environmental law"-a field of law that is international, national, and transnational in character all at once.¹ Global environmental law is the set of legal principles developed by national, international, and transnational environmental regulatory systems to protect the environment and manage natural resources.

The Emergence of Global Environmental Law

Environmental law is a collective term encompassing aspects of the law that provide protection to the environment. A related but distinct set of regulatory regimes, now strongly influenced by environmental legal principles, focus on the management of specific natural resources, such as forests, minerals, or fisheries. Other areas, such as environmental impact assessment, may not fit neatly into ...

Environmental law - Wikipedia

International environmental law International environmental law (sometimes, international ecological law) is a field of international law regulating the behavior of states and international organizations with respect to the environment. See Phillippe Sands, *Principles of International Environmental Law* (2nd ed., Cambridge, 2003).
