Templates - Overleaf, Online LaTeX Editor
So, in LaTeX you would input this document as: \documentclass{article} \title{Cartesian closed categories and the price of eggs} \author{Jane Doe} \date{September 1994} \begin{document} \maketitle Hello world! \end{document} Or, in English: This document is an article. Its title is Cartesian closed categories and the price of eggs. Its author is Jane Doe. It was written in September 1994. The document consists of a title followed by the text Hello world! LaTeX Features

Introduction to LaTeX
For unordered lists, LaTeX provides the itemize environment and for ordered lists there is the enumerate environment. The elements within both environments have to be declared beginning with the \item command. The following code examples show how to use the most common types of lists you're going to use in your document. Unordered lists

LaTeX list - Enumerate and Itemize
Here's a sample LaTeX document where I'm experimenting with newenvironment, a definition list, and tables (the tabular environment.I don't have the output with me at the moment, but I think all of these worked correctly when using pdflatex (LaTeX PDF) and latex2html (LaTeX HTML).

For example, you can declare its version and the version of LaTeX you need it to use, load other packages or classes in it, and accept options in the form \documentclass[option,option2]{myclass}. As far as creating a class, no special software is needed.

how to create a template or document class for latex?

Templates are meant to speed up the initial creation of a LaTeX document. Often it is the case that the same packages and document structure will be applicable to many of the documents you are working on, in this case using a template will save you the time of having to input all of this information every time you create a new document.
