MAYEKAWA Global (MYCOM)

MAYEKAWA offers a comprehensive range of compressors with hundreds of models developed in response to the variety of applications required in refrigeration. New gas compressors have been developed for the specific needs of gas compression systems based on our experience in applications including helium, hydrogen, water vapor, chlorine, hydrogen ...

Products: MYCOM: Compressors - Mayekawa MYCOM Europe

MYCOM continually strives to improve the component parts for its refrigeration compressors in order to maximize reliability. The results of improvements are distributed to customers through "Instruction Manuals", "Service Manuals" and "Service News" and are reflected in the R & D activities for new products and new technologies.

MYCOM Products

Intended Use of Compressor . The MYCOM 6HK reciprocating compressor is for refrigerating, cold storage, air conditioning systems and hot-water supply by using refrigerant. Do not use the compressor for any other purposes that are not intended or departing from ... - If you resell the compressor, never fail to attach this manual to the compressor.

Model 6HK Reciprocating Compressor INSTRUCTION MANUAL

Commercially, ammonia is made by combining free nitrogen and hydrogen gases under high pressure and temperature in the presence of a catalyst. The process most commonly used is the Harber-Bosch method. Anhydrous ammonia is the liquid form of pure ammonia gas, technically water-free, and the substance used universally as an industrial refrigerant.

OPERATION OF AMMONIA REFRIGERATION SYSTEMS

Mycom V Series Compressor Basics: (From Mycom Manual) 2.5.1 Basics of the Screw Compressor The screw compressor is a positive displacement rotary compressor. As shown in Figure 2-3 Compressor Mechanism, the refrigerant (gas) is continuously compressed by changing the volume between the casing and the male and female meshed screw rotors, which have different profiles.

Mycom V Series Compressor Repair - Screw Compressors ...

While our screw compressors are suitable for all common refrigerants, GEA focuses on the natural refrigerants NH3 (ammonia) and CO2 (carbon dioxide). Due to its high volumetric efficiency and zero global warming potential, NH3 is a particularly future-proof choice. Learn more with GEA RTSelect – our product selection and configuration tool.

Packaged Screw Compressors | GEA Packaged Compressors

Mycom are now using a hitachi scroll with aluminum windings on Ammonia, we will see how this goes Nonsense in a teapot:D :D try replacing a 8WB Mycom in the time it takes to do an overhaul, well you probably could but it would take a crane to do so, bit of a nonsense really:D
